India Invented Unani/Ayurvedic Medicine for HIV/AIDS

Ref: - MD/PM/RR-5/287/08-06

Date: - 18/08/2006

For the kind attention of P.A/Sec,

It is our earnest request to the concerned Secretary/Personal Assistant or whoever dealing with such matters to kindly pass over this very important letter to the Honorable Prime Minister Dr. Manmohan Singh for his personal perusal and appraisal please.

A personal appeal to the Honorable Prime Minister Dr. Manmohan Singh: - It is our earnest desire that this cardinal issue be publicly debated threadbare inside the parliament house, and copies of this letter may please be distributed among the members for that purpose.

To,
Dr. Manmohan Singh,
The Honorable Prime Minister of India,
New Delhi.

Sub: -Our extra-ordinarily innovative and proven anti-retroviral unani herbal drug **HOOIMM PLUS** for HIV/AIDS – Seeking your official support and substantial cooperation for either (1) starting a joint venture with government of India, or (2) to arrange conditional sellout of our formula for AIDS after successful invitro and invivo tests, to world nations and thus help effectively fighting the greatest challenge facing contemporary humanity.

Respected Sir,
Praise be to the Almighty Lord of Mercy, we are delighted to denote here of our recent breakthrough in medical field, when the prestigious All India Hakeem Ajmal Khan Award was conferred on Hootone Remedies for “Invention of Unani Formula for HIV/AIDS” on 28th September 2005 by the Honorable Union Health Minister Dr. Anbumani Ramadoss.

As an ardent and patriotic Indian Muslim who devoutly practise the teachings of the Holy Prophet Muhammad Sallallahu Alaihi Vasallam who proclaimed, “Patriotism is part of faith”, I do hereby dedicate my invention to my beloved Motherland (Bharatmata), and would like to declare hereby, “India invented Unani formula for HIV/AIDS”, rather than “Hootone Remedies invented it”.

I would like to register here my heartfelt thanks to Dr. Anbumani Ramadoss, the honorable union health minister who conferred on us “The All India Hakeem Ajmal Khan Award”, the team of doctors including Dr. Qazi, Dr. Nirmala from Central Council For Research in Unani Medicine who visited our organization, verified the patient’s documents, approved and forwarded it to the Union Ministry Of Health. Also extending my special thanks to the members of parliament namely Sri. Punnulal Mohale & Sri Raosaheb Patil Danve who raised the issue inside the parliament on 25/08/2004 (Lok Sabha unstarred question no. 4112). I can’t help mention here with thanks my encouraging experiences shared years back with the two outstanding politicians - statesmen in democratic India Dr. C. P. Thakur, Former Union Health Minister who spent more than one and a half hours with me in his residence at Delhi in spite of his busy engagements as union minister, had a detailed discussion, having fully convinced himself after verifying all the HIV positive turned negative reports of the patients, assured his full cooperation which did not materialize for reasons unknown and similar experience with Sri. Lalu Prasad Yadav in his residence at Patna (photographs of both the meetings enclosed herewith).

We would like to elaborate the above said two options as stated below –

The basic criterion for starting a joint venture with the government of India would be – manufacturing as well as distribution will remain under our sole responsibility whereas government on their part would extend their hundred percent co-operation towards leading the joint venture to blossom and grow up as an internationally acclaimed healthcare empire dedicated for serving the suffering humanity, by undoing every loophole that helps the bureaucracy to thrive on corruption etc and create a most congenial atmosphere for us to plan and execute the minute details of the ongoing project without unwarranted interruption from the administrative setup of the government.

According to the first option, Government of India will provide us with a lumpsum amount of two billion dollars (nine thousand crores of Indian rupees approx), tax free in lieu of sharing the profit fifty-fifty. The fund will be utilized by us for the infrastructure required in manufacturing the medicines by Hootone Remedies and distributing it through Hakh Medical Foundation, a registered charitable trust, at concessional rates in India and at normal rate in international markets and the profit earned therefrom shall be shared fifty-fifty with Government of India for ever.

I would rather pay utmost preference to the second option from the depth of my heart because_____

Our motive is strictly spiritual and motto, ‘service to humanity’. Spiritually thinking, ‘Man is One, although men are many’. According to Hindu scriptures, ‘every human being (irrespective of caste, creed, color, country, gender or whatsoever) is potentially

divine'. According to Holy Quran, 'Man is the best of His creations', because 'he was created in His own image as stated by the Holy Prophet Muhammad Sallallahu Alaihi Vasallam, who further stated, 'whole humanity is the family of Allah and one who serves His family best shall be nearest to Him'. Hence, it has always been my heart's desire to render the best possible services to His family and thus earn His pleasure and nearness. And the All Merciful Almighty All Knowing Creator Lord Allah has bestowed me with the most precious gems of innovative therapeutic knowledge of medicines including that for HIV/AIDS which I would like to disseminate to the world for the benefit of the suffering millions before breathing my last. As a patriotic Indian I prefer to publicize it through my government who has been time and again contacted through correspondence and otherwise for that purpose for more than two decades now. As the present administrative head of my country I hereby beseech your help and cooperation for the fulfillment of my last wish i.e. dissemination of my very precious knowledge of medicine to the world of humanity.

So in the second case, since the dreaded disease is spreading like wildfire everywhere and we are eager to serve humanity as a whole, we intend to expeditiously extend our sphere of activities worldwide through our government, wherein the government shall arrange to collect a consolidated amount of ten billion dollars from the affluent countries of the world, say a twenty of them, leaving the poor countries as sheer beneficiaries. However, India is receiving aid in the name of AIDS from affluent countries. It has also become an open secret now that very huge amount of money funneled through many so called NGOs and others by United States and philanthropic Americans like 'Gates & Melinda Foundation' is going into the pockets of corrupt people who criminally exploit the dreadful name of HIV/AIDS for their own nefarious ends. Fortunately, we are presently in a prestigious position to offer our formula for AIDS and in turn seek monetary help from those countries so as to implement our very broad based social service schemes to eradicate AIDS from the face of the earth. We are not amassing money for pomp and splendor but to utilize it for the good of humanity, and for rendering disinterested service to humanity money is a must. After striking the deal in the case of AIDS we intend to disclose our similar extraordinarily effective formulae for Hepatitis, Cancer, Kidney Failure and Heart Diseases etc for the welfare of the world humanity. Out of the aforesaid ten billion, six billion (tax free) shall be utilized by Hootone Remedies for (1) 3 billion for improving the existing infrastructural facilities and (2) remaining 3 billion for organizing various philanthropic works like construction and maintenance of hospitals, orphanages, educational and vocational institutions, training centers etc for the upliftment of the downtrodden sections of society in particular and the people at large in general; and the rest four billion shall be similarly utilized by the government for the same purpose. We will extend our wholehearted cooperation to government for establishing and maintaining similar institutions all over India, apart from providing technical know-how for manufacturing the medicines and we will impart technical training free of cost to at least one medical personnel each from every nation of the world.

We shall develop unique kind of ashrams in Kerala, Tamil Nadu and Maharashtra to begin with, and later on, as opportunity felicitates itself in due course

of time, in every state of India where patients shall be given holistic treatment through our own innovatively developed unique methods. For example, apart from organizing and running sophisticated and well equipped hospitals and associated institutions like medical college in its premises, we shall grow such rare varieties of medicinal herbs, shrubs and trees in the ashram gardens, just by sitting under them during daytime will help the patients to relieve of their diseases. Government will also organize such facilities in the vicinity of ours so that we can easily provide the technical know-how, impart training to the personnel free of cost for the successful implementation of such schemes. The foolproof evidence for the proven efficacy of our herbal medicine HOO- IMM Plus is as elucidated below: -

- 1) 6ml serum / blood sample is to be drawn from a person previously infected with HIV/AIDS and later completely cured after undergoing the complete course of treatment with our medicine HOO-IMM Plus.
- 2) The sample for HIV-DNA PCR antigen test is to be cautiously handled as per the NABL guidelines and to be sent to a renowned and reliable PCR Molecular diagnostic lab.
- 3) 3 ml of the sample is to be allocated for Western Blot Antibody test and the other 3 ml for HIV DNA-PCR Antigen test.
- 4) The result of the above mentioned tests would show that the blood sample is positive for Western blot Antibody test & Negative for HIV DNA-PCR Antigen test.
- 5) This directly interprets that at present the person is HIV negative though he still carries HIV antibodies (which is not harmful to health), authenticating his earlier infection with HIV virus.
- 6) The scientific reason behind this reporting is that our body immune system creates cell mediated immunity responses towards HIV antigen to produce antibodies that may persist for a long time, even after the antigen is completely eliminated from the body. The other best example is Mycobacterium Tuberculosis antibodies.

The human body can respond to antigen in many different ways. These fall into two major categories:

- Antibody-mediated immunity. Antibodies, dissolved in blood, lymph, and other body fluids bind the antigen and trigger a response to it. (This form of immunity is also called humoral immunity).
- Cell-mediated immunity (CMI). T cells (lymphocytes) bind to the surface of other cells, display the antigen and trigger a response and may remain in the body for a long time. The response may involve a) other lymphocytes and b) any of the other white blood cells (leukocytes)

7) Therefore, the above mentioned persons who are free from HIV antigen can, now freely marry and indulge in sexual activities without any risk of infection to their life partner, women can conceive without any chance of transmitting the disease to children (though antibodies are likely to be transmitted between the marital partners or from mother to fetus, it is not harmful to health) and lead a very normal life.

(It seems that majority of the laboratories and doctors are still unaware of this latest molecular diagnostic test called HIV/DNA PCR antigen test)

There is no gainsaying the fact that AIDS has become the focal point of world attention. Many a governmental and non-governmental organization around the world, apart from WHO is planning and executing programs aimed at prevention and eradication of this dreaded disease. Billions of dollars are set aside for the purpose of 'researching and developing' an effective remedy for AIDS which is still universally labeled as 'incurable', paradoxically though, we have been very successfully treating this disease with our Indian medicine for more than two decades but we could not properly highlight it since there was no any foolproof method to prove it. But with the recent development in Molecular Diagnostic Testing called HIV DNA-PCR Antigen test we are in a position to prove scientifically in light of medical science that a HIV/ AIDS patient can completely be cured after undergoing treatment with our Unani medicine HOO-IMM PLUS.

AIDS came to limelight in early eighties, and we wrote to our late Prime Minister Mrs. Indira Gandhi on 05/01/1982 and also to WHO on the same date, regarding the potential threat of this great health hazard and our successful treatment for it. Mrs. Indira Gandhi promptly responded to our letter which can be observed on our website www.hootone.com. Later on, we wrote to our former Prime Minister Sree Atal Bihari Vajpayee on 03/01/2000 and again on 15/05/2002, and to Dr. C. P. Thakur, then Health Minister of India on 15/05/2002, to the President A. P. J. Abdul Kalam on 24/07/2002 and again on 05/06/2004, to Shri. Shathrugan Sinha and Shrimati Sushuma Swaraj the then Union Health Ministers on 08/08/2002 and 14/11/2003 respectively, and to Mrs. Sonia Gandhi, UPA Chairperson, Dr. Manmohan Singh, the present Prime Minister and Dr. Anbumani Ramadoss, the present Union Health Minister on 05/06/2004, the present Prime Minister Dr. Manmohan Singh, again on 05/05/05, 18/05/05, 15/09/05, 22/12/2005 and to the concerned authorities of both provincial and central governments on various occasions but dismayed to receive no response except some lukewarm replies from a very few of them.

And we have to point out here with regret that we had very sour experiences from the central government organizations like NARI, NACO, SIRO, INTECH, NCL; and MSASC of government of Maharashtra. We have very explicitly written in our letters dated 26/03/2002, 26/08/2002, 20/08/2002, 20/08/2002 and 21/01/2001 respectively, addressed to above institutions that we had already researched and developed a time-proven Unani herbal anti-retroviral drug for HIV/AIDS, requesting them to arrange for conducting it's anti-retroviral drug sensitivity test so as to scientifically establish the fact that HIV/AIDS is curable with our herbal drug HOOIMM PLUS which recorded 98% inhibition against the causative agent HIV in standard protocol anti-retroviral drug sensitivity test in invitro testing, whereas other anti-retroviral medicine available in the present global market recorded inhibition from 35-60% only. But, instead of assisting us on that score they suggested in their letter dt.29/01/2001 as well as in their letter dt.17/08/04 in response to our letter dt.05/06/04 addressed to Honorable Health Minister of India, to forward an application to NARI for grant-in-aid, which is not at all our botheration, nor are we least interested in any monetary aid from any corner for that purpose. Our purpose is purely to serve humanity by making our medicine easily available in Government hospitals etc and we are ready to supply it at concessional rates. Very recently, we received a letter dt. 07/10/05 from NACO in response to our letter dt. 16/09/05 addressed to the Honorable Union Minister for health Dr. Anbumani Ramadoss. Had it been our intention to earn

money, (we have not received any monetary help from any quarters either governmental or non-governmental in this respect but instead relinquished for the sake of patients, millions of rupees in terms of commissions, usually offered by the concerned institutions for referring them patients for laboratorial tests; we use to insist those institutions to divert such commissions for granting concessions to the patients and Reliance Life Science appreciating our gesture came forward to strike a deal in that respect) we would have long back accepted the offer from multinational companies and migrated to America or other suitable countries and started our joint venture. But as patriotic and social conscious citizens of this great ancient sacred land we deemed it our duty to remain stay put here, serving our fellow citizens first, as charity begins at home, despite rival enmity, repeated threatening calls and abject non-cooperation from many corners. It is a common experience to find that those who live and die for a noble purpose not only outlive in peoples' hearts but their mission also outshines and spreads far and wide in this world after their demise, whereas those who live and die for an evil cause are dead, rotten and forgotten along with the evil they perpetrated during their lifetime.

Ours is an organization founded on the bedrock of spirituality. Our motive is strictly spiritual and our motto, serving the suffering humanity, which we are doing at our level best. We are not in the pursuit of money, power or status but our only concern is to act according to the will and pleasure of our Creator Lord Almighty through selfless service to His 'family' i.e. humanity. Hence, we derive immense sense of satisfaction, pleasure and great peace of mind from our work because, for us Indians, 'work is worship and duty is divine'. It is really a blissful state of mind, as poet Milton put it, "Mind is it's own place, it can make a heaven out of a hell, and a hell out of a heaven." And we simply sympathize with our detractors and enemies especially those on whom divine wrath had befallen for deliberately standing in the way of our noble work and pray for them. Also often feel amused to watch the wicked ways of this mad mad world. See the cruel fun of somebody struggling the whole life for getting entry into the Guinness book by growing long long nails or by sporting a terrible moustache etc. Who are going to be benefited from their ill-advised misadventures and they themselves feeling void, instead of a sense of satisfaction ultimately. If they expended so much of their energy for the good and welfare of humanity, it would have been far better for themselves and for others. Similarly, AIDS can hardly be eradicated by simply advertising posters of film stars kissing the victims so as to arouse human sympathy towards them or by cricketers endorsing condoms as if a safe preventive step against the transmission of virus, but are laudable things if carried out along with indoctrinating people for spiritual awareness so that they keep away from indulging in illegal sex.

We have to invite your kind attention to a knotty problem facing genuine pharmaceutical companies, due to the criminal offence perpetrated by some false ones among them, by supplying spurious drugs to the patients who should be saved from such social enemies at any cost by the government, who legitimately legislate rules and regulations for that purpose. Magic remedies act is such a set of comprehensive rules and regulations promulgated by the government for the common good of the people, in principle, but at times making an adverse effect, in practice. For e.g. there are certain words like 'cure' strictly prohibited to be used as a terminology indicating complete recovery of the patient from a particular disease, whereas 'cure' is so soothing a word that sink deep

into the soul of the afflicted and act as an abracadabra. Especially in the case of AIDS it is so widely propagated as an incurable disease, making a very detrimental adverse effect on the mental equilibrium of the victim, just because there is no remedy for AIDS in modern medicine. Not only AIDS but other chronic fatal diseases like Hepatitis, Cancer, Heart diseases and Kidney diseases etc also have no remedy in that ethics but Indian medicine definitely have remedy for all those diseases. During the last two decades of clinical experience, thousands of HIV/AIDS patients were cured after undergoing treatment with our Indian herbal medicine but couldn't publicize lest it would go against the rule of magic remedies act. After 1998 we have maintained the complete documented records of our treatment so that we are presently in a position to scientifically prove that AIDS is curable with our herbal drug.

Thousands of patients have been cured during the last 23 years. Of late, we founded a charitable trust HAKH Foundation and started strictly maintaining documented records of our patients since 1998 and those records obtained from the most reputed and reliable laboratories having latest sophisticated equipments and employing most advanced technologies like Reliance Life Science (with whom we have signed an agreement to make testing facility in the former's 1600 centers all over India available to patients at discounted rates under HAKH-Reliance charitable schemes) very manifestly establishing the efficacy of our Unani herbal anti- retroviral drug. HOO IMM PLUS, the one and only one anti-retroviral drug available in the present global market that brought about phenomenal changes in the overall physiological and pathological conditions of HIV/AIDS patients and finally recorded negative within one and a half to two and half years depending upon the CD4 counts and RNA Viral Load (Real Time PCR) of the patients, after undergoing the course of treatment following the regimen and instructions stipulated by **HOOTONE REMEDIES** (ISO 9001-2000 and GMP Certified, TM and Patent Regd. Unani pharmaceutical firm established in 1976 with the purpose of serving the suffering humanity and supplying medicines to HAKH Foundation at charitable rates, please visit us at www.hootone.com for further details). One of the main reasons of the high efficacy of our medicine is that we rely on our own genuine raw herbs innovatively developed, potentizing medicinal plants with herbal potentized fertilizers in our own 108 acres of herbal garden at Latwan in Ratnagiri District, as well as in our native place Kerala, nourished with the purpose of meeting the potential bulk demand in global market. It is a great providential boon and blessing for mankind from the All Merciful Lord. We praise Him and thank Him immensely from the innermost depth of our heart for His benevolent favour upon humanity.

Five years back, three multinational companies including an American one, had taken thousand kilograms each of our bulk samples of HOOIMM PLUS and conducted the invitro and invivo test. Having fully satisfied with the results they came forward with an offer for joint venture with a commitment to invest 2 billion dollars with mutual understanding to share the profit fifty-fifty, out of which 1 billion dollars we are planning to spend for improving the existing infrastructure, and the remaining 1 billion dollars for philanthropic works like building hospitals for providing free treatment to poor patients, orphanages, educational institutions and vocational training centers for uplifting the backward and downtrodden strata of society. (If at all any claim of cure from any corner of the world come to our notice, we reasonably assume it to be either a false claim or

achieved by someone with our three thousand kgs sample supplied five years back, because we confidently believe that by the grace and mercy of Almighty Lord ours is the only organization existing in the present world who can claim it with the support of scientific proof on the basis of systematically maintained documentary records). But, we have not finalized the deal in spite of their insisting still, primarily because of our top priority to make a workable arrangement with our own government so that our own fellow citizens would first get benefited most. Ours is the world's biggest and most vibrant democracy. But the democratic setup has its own demerits: the most important among them in my opinion is slow moving administrative machinery for which we are paying a heavy price. If the government and concerned authorities heeded to our repeated requests earlier, it would have paved the way for saving millions of human lives perished on the altar of this disastrous disease, together with replenishing our public exchequer and bringing great name and fame for our motherland. So, this is the last and final appeal to the government and concerned authorities to either decide to adopt a positive stance in this matter, or intimate us of their clear-cut reply of negation so that we are free to chalk out our own plan and programs to serve the suffering humanity at large, in general and our countrymen, in particular.

Out of the thousands of HIV/AIDS patients cured by our **HOOIMM PLUS**, the five rarely brave ones among them ventured to expose their identity before the media and the public at large with the best of intentions to help their fellow victims. They are by names 1) Mrs. Shamim Shabir 2) Mr. Ansarul Haq 3) Mr. Mohd. Murtuza 4) Mrs. Sulabhai and 5) Mrs. Sangita Lasure who initially showed reactive (positive) through western blot antibody test, after undergoing treatment with our herbal medicine recorded not-detected (negative) through HIV DNA-PCR antigen test. In spite of the social stigma and ostracization attached with the disease they voluntarily agreed and are committed to interact with responsible persons representing electronic and print media, government authorities including judiciary as and when required, to disclose their personal experiences during and after treatment, strongly motivated with the feelings that their fellow victims should know, there is effective treatment for AIDS in our Indian medicine, and that they might get benefited from it. They also agreed with us to undergo western blot antibody test for demonstrational purpose to prove that they were ex-victims of HIV/AIDS, so that we are in a position to provide foolproof evidence of the proven efficacy of our medicine to those who are genuinely interested to know the bare truth that **AIDS is curable with HOOIMM PLUS**.

The detailed medical history of the above mentioned five patients are as given below.

- 1) Mrs. Shamim Shabir, whose husband expired in Nov-2000 due to full-blown AIDS and later she tested reactive for HIV through western blot antibody test during pregnancy from MGM hospital DID No. Ext-5427 dated 01/12/2000, started taking medicine from HAKH Foundation and felt improvement in her health condition. Subsequently, she was relieved from all the symptoms she had earlier and was later tested not detected (negative) for HIV. Proviral DNA-PCR antigen test from Reliance Life Sciences PT No. 18513 dated 04/06/2004 and presently she is leading a healthy and confident life, taking care of her children, earn her livelihood by teaching in classes.

- 2) Mr. Ansarul Haq was tested reactive for HIV through western blot antibody test on 01/12/2000 DID No. EXT-5427 from MGM hospital, started treatment by the HAKH Foundation and was ultimately tested not detected (negative) for HIV Proviral DNA-PCR antigen test from Reliance Life Sciences on 12/07/2004 P.T.No.20336
- 3) Mr. Mohd Murtuza whose wife expired due to full-blown AIDS later tested himself positive for HIV through western blot from MGM hospital DID No. Ext-7091 dated 05/11/2002, hence started treatment by the HAKH Foundation and after undergoing treatment for 18 months he turned not detected (negative) for HIV Proviral DNA-PCR antigen test from Reliance Life Sciences PT No.19677 dated 25/06/2004.
- 4) Mrs. Sulabhai, whose husband expired due to full-blown AIDS and later she tested reactive for HIV through western blot antibody test during pregnancy from Metropolis Laboratory PID No. 304141963 dated 20/10/2003, started taking medicine from HAKH Foundation and improved her health condition. Subsequently, she was again tested detected for HIV DNA-PCR antigen test from Reliance Life Sciences PT No. 19678 dated 29/06/2004 and so continued the treatment for another 6 months and then she went for DNA-PCR Test from Reliance Life Science PT No. 33910 dated 16/01/2006 and recorded 'Not Detected' for the presence of HIV and presently she is leading a healthy and confident life, taking care of her children, earn her livelihood by working in a government service dept.
- 5) Mrs. Sangita Lasure, whose husband expired due to AIDS and after 5 months in March-2004 she was detected positive for HIV and started taking medicine from HAKH Foundation and felt improvement in her health condition. Subsequently, she was relieved from all the symptoms she had earlier and was later tested undetectable level for RNA HIV viral load count from Reliance Life Science PT No. 20394 dated 09/07/2005 but again proved to be positive for HIV in the same report and so continued the treatment for another 3 months and then she went for DNA-PCR Test from Reliance Life Science PT No. 27375 dated 15/10/2005 and recorded 'Not Detected' for the presence of HIV and presently she is leading a healthy and confident life.

The whole world is in search of an effective medicine for HIV/AIDS, which we have with us. Moreover, we are privileged to have inherited very precious traditional knowledge of Indian medicine from our forefathers who were court physicians under the erstwhile Travancore dynasty in Kerala and we do hereby assure to utilize our highly innovative knowledge in that field for the betterment of the suffering millions of the world. It is distressing to understand that the incidence of HIV infection is increasing at an alarming rate in India. I'm particularly perturbed to know of it's rapid spreading among the defense force and police personnel, the most vital sections of our society. We would therefore hereby offer to supply HOOIMM PLUS at concessional rates for those two departments, in addition to the charitable works we are already implementing at present. Apart from that for HIV/AIDS we are manufacturing very efficacious medicines for hepatitis, cancer, kidney diseases, heart diseases, blood pressure and diabetes, which have no other effective remedies in the world now.

I am very pleased to inform you that by the Grace of Almighty Allah I have some rarely innovative and unique proposals, if implemented, will make far reaching revolutionary changes in the medical field. For example, I have many innovative ideas for manufacturing some instruments like Lifespan detector, Efficacy detector, Heart regulator, Pancreas regulator etc. which can be manufactured on very large scale so that, by the grace of Almighty Allah we are confident of recovering the 2 billion dollars in one & half years and our nation would become world leader in medical field.

I deem it my duty to bring to your awareness an inhuman act, knowingly or unknowingly committed by some of the blood banks in our country, whereby innumerable lives are lost every year. It happens because the blood stored in such blood banks at present are subjected to Elisa test only, which is not a confirmed test for HIV/AIDS, for which HIV DNA-PCR, antigen test is the confirmatory test. Hence I would request your honorable office to direct the concerned departments to issue orders to such erring blood banks all over the country to strictly follow the norms that blood stored with them should be subjected to HIV DNA-PCR antigen test (unfortunately many of the laboratories in our country are unaware of the latest molecular diagnostic test). ‘Prevention is better than cure.’ so goes the famous medical dictum..

Further I have to point out here another cruel treachery practiced by some, if not all, money monger laboratory owners in our country. If a HIV/AIDS patient is referred to such laboratories for HIV DNA-PCR antigen test, which costs at an average 1800 rupees, they will instead conduct three Elisa tests the kit for which cost 10 rupees each only. If two of the three Elisa tests turn positive they will furnish a false report for HIV DNA-PCR antigen test. Similarly if a HIV/AIDS patient is referred for Western Blot antibody test, which costs 1000 rupees at an average, they will instead conduct three Elisa tests. If two of them turn positive they will prepare a false report putting few bands of their imagination as positive and produce a false Western Blot report. Of course there are lot of genuine laboratories who perform their duty most honestly and sincerely.

A Pioneering Proposal from your fellow citizen.

As a humble honest citizen of this great “Land of spirituality” where the Vedic dictum, “every soul is potentially divine,” dictates the course of life, I often use to supplicate to the Creator and Sustainer of the worlds, Almighty Allah for facilitating the utopian model of an India leading the world on the principles of liberty, equality and fraternity and the whole set up of the present world of chaos, confusion, calamity and bloodshed, existing on ‘divide and rule’ policy gradually giving way to a new set up of peace, prosperity and general welfare governed by the policy of ‘love and rule’. We find the former system a complete failure everywhere and throughout human history because human being cannot be conquered or controlled by brute force but by love only. Prompted by the former policy billions and billions are wasted for creating and maintaining mutual rivalry and bloodshed but the same billions could have been spent for improving the health and standard of living of the starving millions of the world inspired by the latter policy so that the whole scenario of the world would have changed for the better- there is no fighting between India and Pakistan, Iran and Iraq, Palestinians and Israel; intrusion of the only super power into poor

Afghanistan and Iraq nor terrorism or Gujarat genocide, Kashmir killings etc in our own country, everywhere peace and prosperity only.

Since I honestly feel you are a God fearing man well aware of the tremendous responsibility thrust upon you by virtue of your lofty position as Prime Minister of this great land of 1200 millions, I earnestly request your esteemed office to reorient our whole policy for achieving that noble goal, while persuading other nations especially the dominant ones of the present world like U.S.A, Soviet Russia, China, France, U.K, Germany, Japan etc. to pursue this revolutionary path, treaded and tested most successfully by our saints and seers throughout the ages of human history.

Anticipating early response in this regard.

Yours Honestly & Sincerely,

Dr. (Hakeem) Sayyed B. A. Kareem
Managing Director
Hootone Group of Companies.
